PE100+ Supports Polyethylene Pipe Market Development in Poland

Participation in Wod-Kan event end May 2008

The Wod-Kan conference and exhibition is the biggest event for water end-users in Poland. Local representatives of member companies from the PE100+ Association have presented the Association and its role in promotion of quality and technical education

PE100+ Participation to Plastics Pipe conference in Poland

On 4th and 5th December 2008 the PE100+ Association sponsored a conference on Plastics Pipes organized by the Polish Pipes Producers Association with attendance from designers, water companies, contractors, engineers and other participants in the water supply chain.

This action was done in collaboration with PVC4Pipes, to sustain the global role of plastic pipes versus more traditional materials in water supply, sewage and drainage.

The event saw about 150 participants, with large presence of end-users, very active participation and high interest for performance of plastics pipes and new technical solutions like multilayer pipes

PE100+ Association contributed several papers and speakers

- Ulrich Schulte: *Facilitating the pipe system choice*
- Pierre Belloir: *PE 100 & PE 100+ materials and pipes*
- Baudoin Sencie: *PE 100 The most versatile material for pressure pipe applications*
- Christian Goetzloff: *The development of multilayer pipe construction*
- Antonio Belforte : *Non conventional installation techniques' requirements*
